

MD JUBAYER KHAN

Dhaka, Bangladesh

+8801971206180 | jubayerkhan741@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary of Qualifications

- **Software Engineer** with a strong foundation in **Full-Stack Architectures**, specifically utilizing Next.js and Laravel to build scalable, production-ready ERP systems.
- Experienced in **Requirements Engineering**, acting as a technical liaison for international clients to translate complex business logic into functional software architectures.
- Proven ability in **Figma-to-Code implementation**, delivering pixel-perfect, responsive user interfaces with a focus on UI/UX fidelity and performance optimization.
- Winner of the **Regional First Position** in a national Creative Talent Hunt organized by the Ministry of Education, demonstrating high-level analytical reasoning and problem-solving skills.
- Actively developing expertise in **AI-Driven System Scalability** and modern backend frameworks including NestJS and Python.

Research Interests

Primary: Software Engineering, Artificial Intelligence, Scalable Systems, Full-Stack Web Architectures.
Secondary: Cloud Computing, Scalable System Design, Machine Learning, Cyber Security, Human-Computer Interaction.

Education

Bachelor of Science in Computer Science & Engineering January 2025
Dhaka City College, Bangladesh National University **CGPA: 3.36 / 4.00**
Medium of Education: English | **IELTS Academic: 6.5** (L: 7.5, R: 6.0, W: 6.0, S: 6.5)
Relevant Coursework: Analysis of Algorithms, Software Architecture, Database Systems, Artificial Intelligence, Operating Systems.
Independent Study: CS50P: Programming with Python (Harvard University) – Focus on Computational Thinking and Logic.

Technical Skills

Systems & Backend: Laravel (PHP), Node.js, NestJS (Learning), MySQL (Schema Design & Migrations), REST APIs.
Web Architecture: Next.js, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS.
Engineering Tools: Git/GitHub, Docker, Figma (Pixel-Perfect Implementation), Postman, Vercel.

Professional Experience

Software Engineer December 2024 – Present
Annanovas IT Ltd, Dhaka, Bangladesh

- Engineered and maintained scalable web applications utilizing Next.js and Laravel.
- Requirements Engineering: Acted as a bridge between international clients and technical teams by translating complex business models into functional software requirements for ERP systems.
- Technical Documentation: Authored comprehensive technical documentation and end-user manuals for Asset Management software, ensuring high system adoptability and clear knowledge transfer.
- Optimized database queries and API response times, significantly improving system reliability.

Professional Projects Experience (UK-Based)

Askvalor – Legal Services Marketplace | [\[GitHub\]](#) | [\[Live Link\]](#)

Role: Frontend Developer | Tech: Next.js, Tailwind CSS

- Engineered the entire user interface from the ground up, ensuring a high-fidelity, pixel-perfect implementation of the platform's visual design.
- Developed a modular component library to maintain visual consistency across complex legal service listing pages and user workflows.
- Optimized frontend assets and layout structures to ensure responsive performance across mobile and desktop environments.

Nextpick – Media Finder Platform | [\[GitHub\]](#) | [\[Live Link\]](#)

Role: Frontend Developer | Tech: Next.js, Tailwind CSS

- Spearheaded the complete UI development from scratch, building an intuitive and modern interface for media discovery and exploration.
- Implemented complex, dynamic layouts to display media recommendations and search results with a focus on fluid user transitions.
- Leveraged Next.js and Tailwind CSS to build a lightweight, CSS-efficient frontend that minimizes load times and enhances visual clarity.

Safino – Educational Platform | [\[GitHub\]](#) | [\[Live Link\]](#)

Role: Frontend Developer | Tech: Next.js, JavaScript, Tailwind CSS

- Spearheaded the migration of the platform from React.js to Next.js to leverage improved routing and page-load speeds.
- Enhanced the system's maintainability by implementing modular component architecture.

AHES – Student Support System | [\[GitHub\]](#)

Role: Full-Stack Developer (Internal Training Project) | Tech: Laravel, MySQL, Blade, Figma

- Figma-to-Code Implementation: Translated high-fidelity Figma designs into responsive, pixel-perfect UI components using Laravel Blade and CSS, ensuring 100% design accuracy.
- Dynamic Frontend Control: Engineered a robust Administrative Dashboard that allows for real-time control of all frontend content, transforming a static UI into a fully dynamic application.
- Full-Stack CRUD Development: Developed comprehensive CRUD operations to manage system data, supported by custom MySQL migrations and a structured relational database schema.
- Data Management: Integrated backend logic to handle data persistence, ensuring seamless synchronization between the administrative inputs and the user-facing frontend.

Academic Projects

Farmers Market Platform | [\[GitHub\]](#) | [\[Live Link\]](#)

Dhaka City College

- Developed a full-stack web platform enabling rural farmers to sell goods directly to urban consumers.
- Focused on UI/UX research to ensure accessibility for users with varying levels of digital literacy.

Honors, Awards & Activities

First Position (Regional Level) | *Srigonsil Medha Onneson (Creative Talent Hunt)*

Organized by the Ministry of Education, Government of Bangladesh

- Outperformed hundreds of participants in a national-level competitive examination assessing analytical reasoning and multi-disciplinary knowledge.

Programming Contests & Community

Dhaka City College Programming Club

- Active member participating in workshops and peer-mentoring sessions on web technologies and C++/Python.
- Participated in several Intra-College Programming Contests.
